AquaVia Ulto Cold Climate

PRODUCT SHEET

An innovative solution that ensures **faster drying times at low temperatures**. Specifically developed for cold climates and year-round use, it quickly dries to a no-track condition, and achieves a no pick-up time (ASTM D711) of just 4 minutes at 10 °C.

AquaVia Ulto Cold Climate is part of our eco-friendly and versatile waterborne paint range. Its specialist formula uses advanced acrylic resins and low VOCs to deliver high-performance, sustainable results.

It is supplied in a **sustainable packaging** system with a reusable outer bag and a disposable inner bag. The outer transport bag can be reused up to 25 times, while the steel pallet has a lifespan of over 100 trips.

Also suitable for post-spraying with glass beads and/or antiskid material to enhance night visibility and skid resistance.

Fast drying even in low temperatures

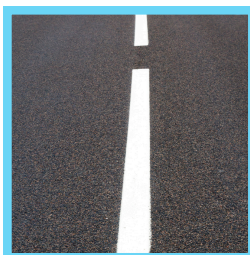

Excellent drying times in cold climates, achieving 30 minutes at 10 °C.

A more sustainable alternative

Supplied in sustainable packaging, with product waste as low as 0.3%.

Significantly reduces project downtime

The practical solution for ensuring efficient project completion.

Sustainable packaging

Designed for liquids and semi-solids, MULTI packaging ensures product quality and safety while offering a reusable and sustainable alternative to traditional drums and IBC tanks. The durable inner bag provides a closed system with protective barriers, avoiding the risk of particle, bacteria, or moisture contamination.
