

The mark of enduring quality

Integrated solutions for cycle lanes

Shared-surface markings for cyclists, motorless vehicles and pedestrians

As cities and towns prioritise sustainable transport, clearly defined, reliable infrastructure for cyclists and other non-motorised users is essential.

Our cycle lane systems combine high skid resistance, vibrant long-lasting colour, and rapid installation to support safe, accessible, and attractive active travel networks.

We supply a versatile range of solvent and waterborne paints, MMAs, epoxy-based systems and preformed thermoplastic markings engineered to withstand daily wear, weather, and UV exposure - keeping routes clear, durable, and visible for longer.

Design

Endures high levels of pedestrian and motorless traffic

Available in vibrant, high-visibility colours to support clear route definition

Installation

Fast drying times minimise lane disruptions and enable rapid reopening

Prismo® Preform is quick to install and easy to replace

Safety

Durable products that maintain visibility and texture over time

High skid resistance to support cyclist stability and reduce accident risk

Certification

UK & Italian manufacturing sites are BS EN ISO 9001 certified for quality management systems

UK site holds BS EN ISO 14001 environmental management system certification

Cycle Lane Product Range

A wide selection of products to meet every specification

Acrilux Solvent-borne acrylic paint

A quick-drying, solvent-based paint with high-quality acrylic resins and pre-mixed antiskid material. Suitable for overspray with glass beads and additional aggregate for enhanced visibility and skid resistance as required.

Helix Waterborne acrylic paint

An eco-friendly, antiskid paint delivering durability and long-lasting colour. Our waterborne Helix paint range resists heavy traffic from motor vehicles while providing a slip-resistant surface for cyclists and other users.

Verace Waterborne acrylic paint

Kind to the environment, our waterborne Verace paint delivers colourful area markings with surface grip and durability built in, ideal for busy cycle lanes. It can also be applied on hot, fresh asphalt.

Tyregrip® Epoxy coloured lane treatment

A cold-applied, epoxy-based high-friction system distinguished by its exceptional grip and durability. Tyregrip® is formulated for a wide range of temperatures and engineered for resistance against oil, fuel and de-icing salts.

Robur® Grip MMA coloured lane treatment

A cold-applied, coloured lane treatment comprised of methyl methacrylate resins and vibrant, durable pigments that can be used in a variety of climates, providing enhanced grip and awareness of shared roadway spaces.

Prismo® Preform Preformed thermoplastic

Our high-quality preformed thermoplastic range is set apart by its high performance, colour stability and durability. It is easy to apply by a propane torch and quickly bonds to the road surface, minimising disruption to traffic.
