

Preformed Thermoplastic for Playground Applications

Eye-Catching Games for Children

Prismo® Playground Preform is part of our preformed thermoplastic range, which is categorised by its high performance, durability and colour stability. This versatile product is our solution for transforming plain asphalt into captivating areas for play.

Prismo® Playground Preform is highly slip resistant, ensuring playtime is safer for all children. It is also designed to be resistant to wear in all weather conditions, meaning whether it is scorching sun or pouring rain, children can continue to enjoy our range of games and designs.

Key Benefits

- High performance product.
- Slip-resistant to maximise playground safety.
- Excellent durability and colour stability.
- Resistant to wear across all weather conditions and temperatures.
- Fast-acting formula reduces turnaround time and gas consumption.

Installation

- Quick and easy to apply by propane torch.
- Ready for play soon after installation.
- For aged asphalt and concrete, use our CP Primer for the perfect base.

Sustainability

- Highly durable material reduces frequency of reapplication.
- Includes up to 45% recycled content.

Formulation

- Formulated with high quality resins, binders, aggregates and pigments.
- Non-reflectorised preformed markings manufactured with antiskid medium for improved safety.

Certification

- Prismo® Preform is certified in accordance with BS EN 1871.
