

The mark of enduring quality

The proven high friction surfacing for saving lives

TYREGRIP®

Trusted worldwide

An epoxy-based BBA-HAPAS Type 1 certified high friction surfacing treatment. Tyregrip® is globally recognised as the ultimate solution to reducing loss of life and avoiding accidents in hazardous areas.

- Improves vehicle steering response
- Reduces braking distances
- Boosts surface traction
- Keeps drivers in control

Proven durability

38-year track record, lasts 10+ years in the real world

Safety first

Composed of high-quality binder overlaid with specially selected calcined bauxite or granite aggregates.

Delivers powerful skid resistance where it's needed most:

Initial skid resistance of ≥ 65 , rising to ≥ 70 with wear.

Quick and easy to apply

- ✓ Cold applied: No specialist equipment
- ✓ Opens to traffic within 2-3 hours
- ✓ Strong adhesion to asphalt and concrete

Proven under test to improve safety
